PROFILE

Junior Software Developer with experience in Full Stack Development, Machine Learning, and Sensor Interface projects. Skilled in Python, JavaScript, TypeScript, React.js, Node.js, SQL, Git, Docker, and REST APIs. Experienced in developing web applications, database management, and predictive analytics solutions. Passionate about building scalable software systems and continuously learning emerging technologies.

SKILLS

Programming Languages — Python, JavaScript, TypeScript, SQL, PHP, **Frontend** — React.js, Tailwind CSS, HTML5, CSS3, **Backend** — Node.js, Express.js, Supabase, **Database** — PostgreSQL, MySQL, **Tools and Platforms** — REST APIs, CI/CD, Git, GitHub, Docker, Xampp, **Soft Skills** — Agile Methodology, Testing, Debugging, Problem Solving, Project Leader, Leadership and Event management skills.

INTERNSHIP

VV Technologies, Intern

09/2022 – 07/2023 | Tumkur

- Developed and maintained web application modules using modern development practices.
- Assisted in sensor interfacing projects and embedded system integration.
- Collaborated with team members using Agile methodologies.
- Participated in debugging, testing, and deployment activities.
- Created technical documentation and project reports.

PROJECTS

Secure Vault, Vite, TypeScript, Supabase, and Tailwind CSS

- Developed a full-stack secure file management application using TypeScript, Supabase, and Tailwind CSS.
- Implemented authentication and cloud storage features, reducing login processing time by **30%** and improving data accessibility.

Digital Cafe Administration System,

11/2023 – 04/2024

Reactjs, php-myadmin, PostgreSQL, and Xampp server

- Developed a digital cafe management system using React.js and PostgreSQL to automate billing, order processing, and inventory management.
- Improved operational efficiency by reducing manual workload and enhancing data accuracy through a centralized database system.

Customer Churn Prediction using Logistic Regression from Scratch,

02/2026 – 03/2026

Python, Numpy, Pandas, Matplotlib, and Logistic Regressions

- Built a Logistic Regression model from scratch using Python and NumPy, achieving over **85%** prediction accuracy on customer churn datasets.

EDUCATION

SSLC, Sri Parshwanatha Education Society

06/2018 – 04/2021 | Chitradurga

87%

Diploma in Computer Science, Government Polytechnic Chitradurga

08/2021 – 05/2024 | Chitradurga

GPA: 9.0

Bachelor of Engineering(Computer Science and Engineering),

09/2024 – 06/2027 | Bangalore

Sir M Visvesvaraya Institute of Technology

GPA: 6.73

CERTIFICATIONS

Python Programming

Issuer: AIG Systems (May 2023)

Data Structures and Algorithms

Issuer: Infosys Springboard (Dec 2024)

Embedded AI using ESP32

Issuer: Cranes Varsity (April 2025)

Tata - Gen AI Powered Data Analytics

Job Simulation

Issuer: Forage (Aug 2025)

Web Development

Issuer: Prodigy Infotech (March 2026)

Machine Learning

Issuer: Launched Global (April 2026)
